

SUMMARY

Motivated and detail-oriented MCA student with a strong interest in full-stack web development, specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in building responsive and interactive web applications with clean, maintainable code. Completed internship experience and personal projects that demonstrate practical problem-solving, frontend/backend integration, and UI development.

SKILLS

Technical Skills: HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, Git, REST APIs, JWT Authentication, Responsive Design.

Soft Skills: Quick Learner , Critical Thinking , Team Collaboration , Problem Solving

Experience

INTERNSHIP - Zidio Development (April- july)

[view certificate](#)

Developed an **Excel Analytics Platform** using MongoDB, Express, React, and Node.js with features like Excel upload, AI insights, and chart generation.

Built an **interactive blogging platform** with authentication, real-time comments, and filtering. Implemented **JWT authentication**, admin dashboard, and data visualization features.

Programmer Analyst / Mentor

Cepialabs | [August 2025] – Present (4 months)

Working as a full-stack developer on an ongoing project, gaining hands-on experience with modern technologies including **Next.js, Tailwind CSS, Node.js, and Python**.

Contributing to both frontend and backend development, focusing on building responsive user interfaces and efficient APIs.

Collaborating with team members and mentoring peers to ensure smooth project development and code quality.

EDUCATIONS

Master of Computer Applications (MCA)

Indira Gandhi National Open University (IGNOU) — ODL Mode

Currently Pursuing (Year of Admission – Present)

PROJECTS

Project 1 : Amazon Website Clone

Created a static front-end clone of the Amazon India homepage to replicate the layout and design using only HTML and CSS. Practiced structuring complex layouts, responsive design, and styling techniques to mirror a real-world e-commerce interface. [source code](#)

Project 2 : Excel Analytics Platform

Developed a full-stack web application to upload, parse, and visualize Excel data in dynamic charts. Implemented user authentication, Excel history tracking, and AI-based summary generation using OpenAI API. Designed responsive dashboards with multiple chart types and export functionality.

Project 3 : Blogging Platform

[source code](#)

Built a secure blogging application with user authentication, blog creation/editing, rich text editing, and user-specific dashboards. Implemented features like image upload, blog filtering, commenting, and admin controls for managing users and posts. Designed responsive UI for optimal user experience. [source code](#)

Project 4 : Personal Portfolio Website

I designed and developed a personal portfolio website using **Next.js** and **Tailwind CSS** to showcase my projects, skills, and experience. The website features a clean, responsive, and interactive user interface focused on modern design principles. It demonstrates my front-end development skills and attention to UI/UX details. The project has been deployed and is publicly available on **GitHub** . [Github Link](#)
